Hey Julian,

Yikes! Wonder what happened here? Probably a result of some automated update. I have removed the captcha for now until I can work out a more secure solution.

Dear Communications,

The *Become a Member* and *Make a Donation* links on the AFA website are throwing the following error:

Unable to load template 'file:CRM/common/ReCAPTCHA.tpl'

If there are any other links that use CAPTCHA, I assume they'll have the same problem?

I've no idea for how long this has been happening. I noticed it a few days ago, but I am only reporting it now in case it initially happened to come across it while maintenance was being done on the site.

Cheers,

Julian
